

LIGHTS, CAMERA, ACTION, *REACTION!*

Drawing on the knowledge that students already have about science, Dr. Les Rawluk will demonstrate the concepts of sublimation, chemical decomposition, polymer behavior, chemiluminescence plus the unique colours of select chemicals, saturation, and the surprising energy change possible during a chemical reaction. In this **Chemistry All Around You** presentation students participate actively in these demonstrations and ask and answer questions throughout the 1.5-hour session.

WHO: Grade 9

WHEN: Monday, Tuesday or Thursdays from May 9th to May 27th

WHERE: Grande Prairie Regional College

TIME COMMITMENT: 1 - 1.5 hours plus travel

TRAVEL: limited transportation reimbursements available upon request
