Grade 4 Plant Growth and Changes*

***By popular demand, ASN is offering a second opportunity to attend this workshop.**

Date: Wednesday April 28th, 2021

Time: 7:00pm – 8:00pm

Place: Google Meet link will be provided

Cost: Free

For who: Grade 4 in class or online teachers

Session Description:

Spring is on the way and that means things are going to start turning green again! The grade 4 Plant Growth and Changes unit is a wonderful opportunity to celebrate the amazing world of plants. Whether you are teaching in class or online, we are offering an opportunity to get excited about plants and save yourself some prep time for this upcoming unit.

Our presenter, Jeffrey Newton, PhD, has 10+ years of science education experience and is passionate about sharing his ideas for making science more interactive for students. He will walk you through the basic unit concepts, offer ideas for enrichment (science slightly beyond the curriculum), and explore demonstrations and activities for your students in class or learning remotely.
