Space Exploration

Peer into current space technologies and discover your passion for astronomy. Join our dynamic presenters as they guide you through activities that will bring Space Exploration to life in your classroom. Amanda Green, is a stellar science teacher and space enthusiast. Sharon Morsink, is an associate professor of Astrophysics and outreach specialist at the UofA observatory. Together, these experts will expand your knowledge and bring confidence to your teaching. The workshop will be hosted at the UofA observatory, with opportunities to view the night sky (weather permitting).
