

## Science Professional Development for Gr. 5 Teachers

*Bring the excitement of hands-on science to your classroom!  
Handouts and resources included with every workshop.*

- Scientists & Engineers  
-in-the-Classroom
- Science Workshops for Teachers
- Hands-on, Minds-on Activities

## Wetland Ecosystems Teacher Workshop!

**For:** Grade 5 Science Teachers

**Date:** Wednesday, May 3rd

**Time:** 6:30 – 8:00 pm (registration at 6:15 pm)

**Location:** MacEwan University, Downtown Campus  
10700 104 Ave, NW, Edmonton

**Cost:** \$35 Includes hands-on activities, resources  
& refreshments.

*Workshop fees are subsidized thanks to our generous donors.*

**Register Online!**

[www.albertasciencenetwork.ca/programs\\_workshops.html](http://www.albertasciencenetwork.ca/programs_workshops.html)

**Presenters:** Workshops are presented by practicing  
scientists/engineers and experienced educators.

### Wetland Ecosystems

Wetlands are some of the world's most productive ecosystems. Spend time with Dr. Marie-Claude Roy, a wetland expert and all around super scientist, to find out why she's so passionate about marshes, swamps, bogs and fens. Explore the types of wetlands found in Alberta, their important values and unique biodiversity. Build confidence in teaching the Wetland Ecosystems unit and get student's excited about the natural world around them. Classroom activities and useful resources will be provided along with a whole 'slough' of fresh ideas.
